Sheela -- Sorry for the delay in getting back to you:

Question: Was there a medical issue that was brought to your attention from contaminated water?

Answer: EPA was not aware of any medical issue. However, EPA took action in January to ensure delivery of temporary water supplies to four homes where available data indicated that residents were consuming well water tat contained levels of contaminations that posed a health concern. EPA's decided to conduct sampling becuae of the request of residents and because the sampling data we had was incomplete and of uncertain quality.

Question: Which specific drilling activity at Dimock of Cabot's was the EPA zoning in on? Location of the gas drilling/producing facility? Is this operation still proceeding or has it been suspended?

Answer: Our focus is first and foremost on the drinking water quality of residents.

Question: So far has the EPA fined Cabot at all ?

Answer: EPA has not taken any enforcment action against Cabot releated to activities near Dimock.

When does your first water sampling date back to?

Answer: Our sampling effort began the week of January 23<sup>rd</sup> and continued for three and half weeks through Feb. 15<sup>th</sup>

Since then how many tests have you conducted?

Answer: Overall, we have sampled wells for 61 homes to date.

Question: I do recall that the January 19 statement indicated that there was a link, but now it appears that your most recent tests show that the water supply is fine, that it does not have any contamination.

Answer: EPA has not done any detailed review to determine the cause. Our focus is first and foremost on the drinking water quality of residents. EPA is not drawing any conclusions at this time.

Hi Roy,

No problem at all.

Essentially, I am trying to get some background on when these tests began and why. I only started covering this around January. So I am missing some pieces, which are critical to me writing up the story.

Was there a medical issue that was brought to your attention from contaminated water?

Which specific drilling activity at Dimock of Cabot's was the EPA zoning in on? Location of the gas drilling/producing facility? Is this operation still proceeding or has it been suspended?

So far has the EPA fined Cabot at all ?

When does your first water sampling date back to?

Since then how many tests have you conducted?

I do recall that the January 19 statement indicated that there was a link, but now it appears that your most recent tests show that the water supply is fine, that it does not have any contamination.

Your prompt response would be greatly appreciated.

Best regards,
